1. Introduction

The Hospital Bed Management System is a web-based platform that helps hospital staff track, assign, and forecast bed availability across different wards. The system includes a secure login page, a real-time dashboard, and data visualization tools for predicting bed demand.

This guide explains how to log in, navigate the dashboard, view bed statuses, and interpret forecast data.

2. System Requirements

- Modern web browser (Chrome, Edge, Firefox, Safari)
 - Internet connection
 - Staff login credentials (created through Firebase Authentication)
-

3. Accessing the System

Website URL

- Access the system via the GitHub Pages–hosted URL:
<https://projectfoundrylab.github.io/capstone-f25-project-repository-group-5/>

Logging In

1. Open the website.
2. Enter your **email** and **password**.
3. Click **Log In**.
4. If authentication is successful, you will be redirected to the main dashboard.

Note: Login uses **Firestore Authentication**, so passwords are securely stored and encrypted.

- Users are added and maintained by a third party.
-

4. Main Dashboard Overview

After logging in, users will see the real-time dashboard. The dashboard consists of several key components:

4.1 Bed Availability Panel

Displays the total number of:

- Available beds
- Occupied beds
- Reserved beds
- Beds in cleaning
- Beds being transferred

Data is updated in real time from the SQL database (mock data for the prototype).

4.2 Bed Status Table

Each row shows:

- Bed ID
- Ward
- Status (Available / Occupied)
- Assigned patient (if applicable)

4.3 Forecast Visualization

Graphs created using **Power BI/Tableau** display:

- Predicted bed demand
- Seasonal patterns (flu season, winter peaks)
- Admission trends

This helps staff plan ahead.

5. Navigation

Top Navigation Bar

- **Dashboard** – home screen
 - **Manage beds** – detailed bed list
 - **Patients** – patient admission info
 - **Insights** – data visualizations
 - **Manage rooms** – detailed room list
-

6. Using the System

6.1 Viewing Bed Availability

1. Go to the **Dashboard**.
2. View the line chart and statistics for real-time availability.
3. Hover over peaks for exact numbers (optional).

6.2 Assigning a Bed

(Planned functionality / future feature)

- Staff will be able to assign patients to beds directly through the dashboard.
- Bed status will update automatically.

6.3 Viewing Admissions

- Navigate to **Patients**.
 - See active admissions and history.
 - Future versions will allow updating admission info.
-

7. Logging Out

1. Save all work and click the **Logout** button in the top right corner.
2. Firebase Authentication ends your session.
3. You are returned to the login screen.
